Passenger Car, SUV/4x4, and Light Truck Tires

RESEARCH AND DEVELOPMENT

WORLD CLASS R&D CAPABILITIES

Giti Tire's **Global One** R&D organization brings together a diverse skilled manpower and the latest advanced technology resources from across North America, Europe, China, and Indonesia to develop products tailored to the most demanding requirements of customers in every region of today's fragmented global market, consistently delivering timely, innovative, high performing, and affordable products.

Giti Global One R&D

- ①  R&D Center Europe
- ②  Europe Testing Center
- ③  R&D Center USA
- ④  R&D Center China
- ⑤  R&D Center Indonesia

Our Motorsports Technology in Your Tires

Giti Motorsports activities serve as a perfect proving ground where tires are pushed beyond design limits to generate valuable engineering data.

- Making better, safer everyday driving tires for our consumers -

SAFETY

Shorter wet braking

EXCEPTIONAL HANDLING

Responsive wet & dry handling

COMFORT

Comfortable ride

advanztech
Precision Handling

A unique construction that locks together for greater rigidity when traction is needed most, without giving up handling and wear performance.

Features

Benefits

New asymmetric pattern design

COMFORT & SAFETY: Optimal grip on wet and dry surfaces and a low noise level even at high speeds

Solid centre rib

COMFORT & SAFETY: Straight line stability and steering response

4 wide longitudinal grooves

SAFETY: Ensures efficient water evacuation, preventing aquaplaning

Silica compound

HANDLING: Enhanced grip on wet surfaces

**OFFERING
CONFIDENT HANDLING
AND A LUXURIOUS RIDE**

Top level production. R&D. and quality control standards

 Summer tire for paved roads

Giti Comfort T20

This new innovative tire is designed for modern passenger cars and SUVs. It promises low noise, outstanding mileage, and strong body construction to protect you from road hazards on your journey.

HIGH MILEAGE
Long lasting

SAFETY
Shorter wet braking

COMFORT
Comfortable ride

EQUAL FORCE CASING DESIGN
Improves overall handling, lowers irregular wear, and increases tire life

advanztech
Silent Tire Technology

Uses advanced computer calculation methods to get the most optimized pattern design, minimizing driving noise.

Features

New tread compound

Five points equilibrium contour profile for optimal footprint

Stronger body plies with high turn up design

Computer-aided five pitch noise reduction pattern design

Four wide longitudinal grooves

Benefits

- **HIGH MILEAGE:** Endurance and durability in versatile conditions, providing outstanding mileage
- **DURABILITY:** Strong casing endurance and stiffness, with footprint that delivers optimal contact area for better handling and mileage performance
- **SAFETY:** Reduces risk of sidewall bulges and promotes durability
- **COMFORT:** Lower noise and improved overall driving experience
- **SAFETY:** Better water evacuation, for safer driving in wet or rainy conditions

* Coming Soon

COMBINING DURABILITY,
LONG MILEAGE,
AND LOW NOISE

All-season tire for paved roads

Giti Comfort 229

A versatile all-season tire, balancing comfort, control, safety, and mileage in all weather conditions.

SAFETY

Shorter wet braking

EXCEPTIONAL HANDLING

Responsive wet & dry handling

COMFORT

Comfortable ride

EQUAL FORCE CASING DESIGN

Improves overall handling, lowers irregular wear, and increases tire life

advanztech

Silent Tire Technology

Uses advanced computer calculation methods to get the most optimized pattern design, minimizing driving noise.

Features

Optimized tread block design with integral lateral grooves and sipes

Four deep, wide circumferential tread grooves

Advanced tread compound

Stable shoulder block with lateral grooves

Benefits

➤ COMFORT & SAFETY: Provides wet handling capabilities and reduces road noise

➤ SAFETY: Provide excellent water channeling and anti-hydroplaning performance

➤ SAFETY: Generates excellent grip in wet and dry conditions

➤ SAFETY: Reduces tread block movement and ensures quick steering response and cornering grip

HT

All-season tire for highway terrain roads

Giti 4x4 HT 152

A new and unique pattern design that focuses on top mileage, handling, and durability for SUV and 4x4 vehicles

SAFETY

Shorter wet braking

EXCEPTIONAL HANDLING

Responsive wet & dry handling

EXTRA MILEAGE

Long lasting and durable

●○○○○

●●○○○

●●○○○

●●●●●

EQUAL FORCE CASING DESIGN

Improves overall handling, lowers irregular wear, and increases tire life

advanztech Extra Durable Technology

Combination of tread compound, pattern design, and overall casing structure that significantly improves tire durability and rigidity.

Features

Full jointless cap ply band restrains steel belt

Advanced 5PEC technology

Specially developed tread compound

Professional PDT analysis tools to determine the pitch as well as no. of sections

Benefits

- SAFETY: Provide durability and safeguard at high speed
- HANDLING : Pressure distributed evenly on the contact area to get excellent dry/wet handling
- MILEAGE: Deliver highly abrasive performance during journey
- QUIET : Tire noise reduction

TIRE SIZES DESIGNED FOR SUV/4X4 VEHICLES

COMBINING DURABILITY,
TOUGHNESS, and GRIP

HT

All-season tire for highway terrain roads

Giti 4x4 *AT* 100

An all-terrain tire for light trucks and SUVs that allow you to take control anywhere you need to go -- whether on highways or off-road

SAFETY
Shorter wet braking

COMFORT
Comfortable ride

EQUAL FORCE CASING DESIGN
Improves overall handling, lowers irregular wear, and increases tire life

advanztech
Extra Durable Technology

Combination of tread compound, pattern design, and overall casing structure that significantly improves tire durability and rigidity.

Features

- Enhanced tread compound
- Interlocked tread blocks and S-shaped central rib
- 3D Grooves with chamfered edges
- Five-Pitch pattern technology
- Rim protector

Benefits

- **SAFETY & DURABILITY:** Provides excellent wet and dry grip, longer tread life, and improved cut / chip resistance.
- **SAFETY :** Excellent handling, stability, and grip on both soft and hard surfaces
- **DURABILITY:** Self-cleaning tread design for consistent off-road performance, while reducing stone holding/drilling
- **COMFORT:** Helps reduce road noise for quieter, and more comfortable ride
- **DURABILITY:** Helps protect wheel from curb damage

COMBINING DURABILITY, TOUGHNESS, and GRIP

AT

All-season tire for mixed terrain use

Giti Van 600

A new generation, comfortable, high load capacity tire, designed for modern high-speed commercial vans.

SAFETY

Shorter wet braking

EXTRA MILEAGE

Long lasting and durable

EXTRA LOAD

Robust & efficient

EQUAL FORCE CASING DESIGN

Improves overall handling, lowers irregular wear, and increases tire life

advanztech
Extra Durable Technology

Combination of tread compound, pattern design, and overall casing structure that significantly improves tire durability and rigidity.

Features

Reinforced construction comprising of two steel belts and full nylon protector

Vertical and open horizontal groove arrangement

Specially designed tread compound

Modern pattern design

Benefits

- EXTRA LOAD: Delivers robust load carrying capacity
- SAFETY : Provides excellent wet and dry grip
- EXTRA MILEAGE: Maximum mileage with reduced heat
- COMFORT: Reduce noise, improving both driver comfort

TIRE SIZES DESIGNED FOR COMMERCIAL VANS

RANGE :

AGILE WITH EXTRA LOAD BEARING PERFORMANCE

All-season tire for paved roads

Giti Utility 668^{V1}

The GitiUtility 668^{V1} is built with excellent carrying capability, high mileage, and no irregular wear.

Designed for light trucks in all-seasons and weather conditions, it is a truly dependable tire.

SAFETY

Shorter wet braking

HIGH MILEAGE

Long lasting

DURABILITY

Strong and robust

EQUAL FORCE CASING DESIGN

Improves overall handling, lowers irregular wear, and increases tire life

advanztech
Extra Durable Technology

Combination of tread compound, pattern design, and overall casing structure that significantly improves tire durability and rigidity.

Features

Specially formulated tread compound and FEA bead construction

Strong bead design and casing

4 circumferential zig-zag grooves and shallow sipe design

Benefits

HIGH MILEAGE: Good performance with anti-irregular wear delivers long mileage

DURABILITY : Good carrying capability for longer service life

SAFETY: Excellent traction and wet braking on all position axles

TIRE SIZES DESIGNED FOR LIGHT TRUCKS

BENEFITS

PEACE OF MIND

Giti's Run-Flat tires give drivers the confidence that they won't be stranded with a flat tire.

THE INNER SUPPORT RING

inside the tire supports the vehicle after a loss of air pressure, allowing the tire to function and the vehicle to continue on the road.

MORE TRUNK SPACE

Giti's Run-Flat tires eliminate the need for a spare tire, allowing for more space to put the things that matter most to you.

With Spare Tire

Using Run-Flat Tire

General Function of Tires for All Types of Vehicles

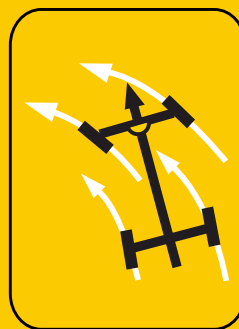

1. Weight-bearing
Air pressure and tire construction are important factors to carry and sustain the weight of vehicles.

2. Absorb shocks
Air pressure and tire construction reduces initial road vibrations and shocks before being muted again by the suspension .

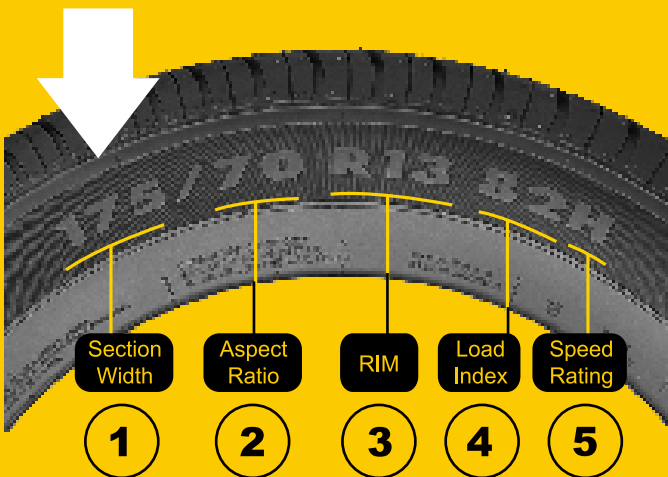

3. Delivering power from the engine
Tires serve to deliver power from the engine to move the vehicle and also provides traction and braking performance .

4. Translating steering wheel movement
Tires are very important in controlling the direction of the vehicle, which will determine the maneuvering capability and stability in driving.

Understand Tire Size

Tires have its 'language' to communicate in the form of a series of numbers and letters to indicating data specification, brand and type. It is universal and has been agreed by all tire manufacturers worldwide.

Here are the meanings of these codes:

1. Tire width (in mm)
2. A tire's aspect ratio is the dimensional relationship of the tire's section height to section width, expressed as a percentage.
3. Diameter of wheel (in inches)
4. Load Index
5. Speed Index

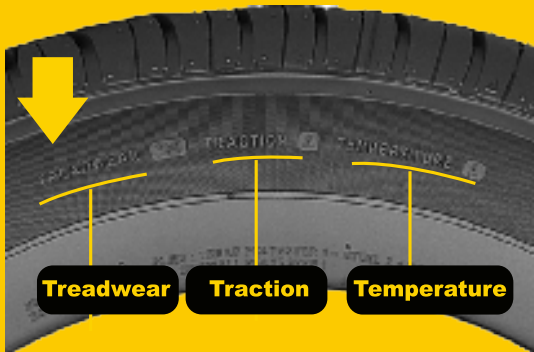

Understand Load Index and Speed Rating

The Speed index is an assigned letter ranging from J to Z that corresponds to the reference maximum speed at the associated load index. Refer to the load index and speed rating tables below.

These two elements put together are called the service description and are mutually dependent. The table below gives the load index and the speed symbol with their corresponding value.

UTQG (Uniform Tire Quality Grades) Rating

The UTQG (Uniform Tire Quality Grades) rating is a labeling requirement by the U.S Department of Transportation for all tire manufacturers. The label of UTQG represents a tire's Treadwear, Traction and **Temperature** resistance. Traction and temperature resistance ratings are specific performance levels, while treadwear ratings are assigned by manufacturers following tests conducted and are reliable when comparing tires of the same brand.

The UTQG rating comprises of 3 components. Treadwear

The treadwear grade indicates the wear rate of a tire and is a comparative rating based on test conducted by tire manufacturers. The grades are not an indication of actual mileage, but can be used as a relative comparison. For example, a grading of 400 should last twice as long as a tire graded 200, given similar driving conditions in the same brand.

Traction

Traction rating is an indication of a tire's ability to stop on wet pavement. The braking distance is indicated by ratings of "AA" (highest braking ability), "A", "B" and "C". Traction rating only indicates straight line wet braking and does not indicate wet cornering abilities of the tire.

Temperature

Temperature resistance rating indicates the tire's ability to withstand heat. It is graded according to a properly inflated and not overloaded tire. It is graded from "C", being the lowest, to "B" and "A" ratings.

Load Index (Symbol and Maximum Load in Lbs & Kg)

Note: A "ZR" may appear for tires having a maximum speed capability above 240km/h (150 mph)

Guide on When to Replace Your Tires

Every tire has a **Tread Wear Indicator (TWI)**, which form a triangle located on the sidewall. TWI is an indicator of tire wear and is also a benchmark to you to check if your tire is worn out. Tires should be changed immediately when the tire tread has surpassed the indicators.

Worn out tires compromises handling and braking distance tremendously.

Do keep a lookout for physical signs stated below, even if the tires have not worn out yet

Bulges on tires
We recommend you to replace the tires immediately, due to high potential of tires bursting

Patches
A sign of potential air leak

Cracks
Normally on the tire's sidewall

Consult your nearest tire dealer if there are any signs of physical damage or deformity of your tires.

Tire Tread Patterns

There any many brands and patterns of tires available today. So how do you know that you are choosing the tires suitable for your driving needs? Generally, tire patterns can be differentiated into 3 categories. The Directional pattern, also known as Unidirectional, the Non-Directional pattern, also known as symmetric, and the Asymmetric pattern.

All Three Categories of Tire Patterns Have Different Characteristics to Provide for Different Needs of Drivers

Directional/
Unidirectional

Directional pattern tires have lateral grooves on both side of the tire which points in the same direction. It is usually in a "V-shaped" pattern.

Features:

- Increase water dispersion to provide good handling in both wet and dry road conditions
- Better steering and braking capabilities
- Usually available in bigger sizes (15" and above) and high speed index

Suitable for:

Drivers who want to have high speed performance level of the tire.

Non-directional/
Symmetric

Non-directional pattern tires have tread pattern that usually has a continuous rib design or blocks which has the same features on both inside and outside tread face of the tire. It is normally in a "wave-like" pattern,

Features:

- Comfort, low noise design oriented tires
- Lateral grooves to provide water dispersion

Suitable for:

Drivers who want to have a comfortable and quiet drive.

Asymmetric

Asymmetric pattern tires have unique patterns differing on both sides of the tire tread. The outer tread area of the tire usually has larger grooves to disperse water to increase wet handling, while the inside tread area usually has smaller grooves to increase contact area with the road.

Features:

- Good handling capabilities on wet and dry roads
- Good high speed cornering capabilities

Suitable for:

Drivers who want tires with high performance capabilities.

Few Tips to Maximize Your Tire Performance and Durability

- Check your tires air pressure at least once a month. Adjust the air pressure according to the manufacturer's instruction manual
- Tire balancing and wheel alignment will increase tire mileage and maintains the performance of the tires
- Use only tire cleaners and water to clean your tires

Air Pressure

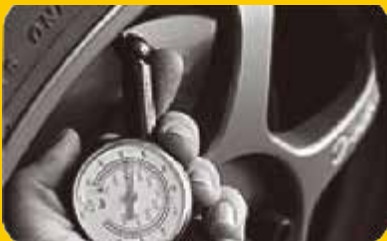

The tire's air pressure standard for each vehicle is set by the vehicle manufacturer and can be found in various areas of your vehicle, such as at the end of the driver's door, at the bottom of the door or in part in the storage box at the door of the vehicle.

Low air pressure can cause damage to the side-wall, thus decreasing the load carrying capacity, and also consume more fuel. Hence the tire pressure should be checked regularly, at least once every month.

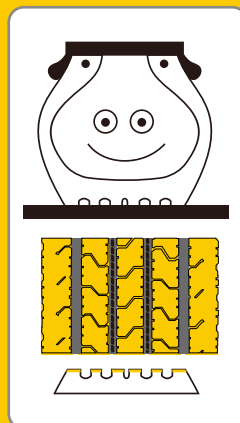

Note:
Allow the tires to cool down after driving before checking the air pressure in order to obtain a more accurate reading.

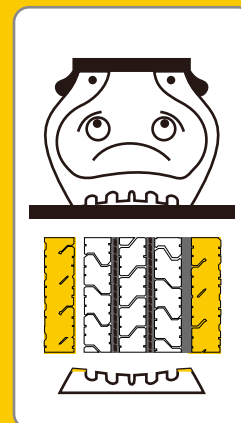

Improper air pressure leads to irregular wear of the tires.

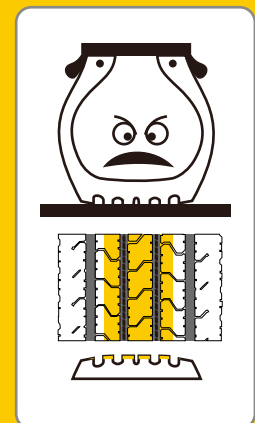

Wear and tear in the middle of the tire is caused by excessive air pressure. On the other hand, low air pressure results in uneven wear on both sides of the tire shoulder.

Correct air pressure results in regular wear and tear of the tire, thus providing a longer tire life

Low air pressure results in wear and tear on both sides of the tire shoulder, creating uneven wear of the tire

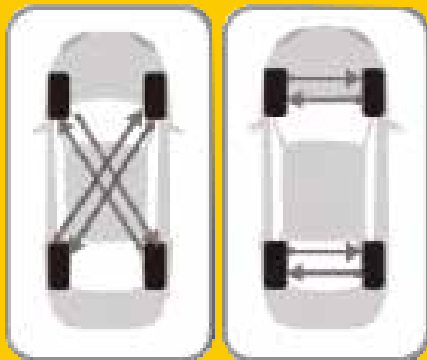

Excessive air pressure results in wear and tear on the middle of the tire, which results in uneven wear of the tire

Rotate Your Tire Regularly to Improve Tire Life

Regular tire rotation helps to prolong the tire's life and maintains optimum performance and mileage of the tires. Tires not rotated on regular basis will result in uneven wear and will also compromise the performance of the tires over time.

Rotation is required when the tire mileage reaches between 8000-10,000 km.

There are 2 different ways of tire rotation, the 4-Tire rotation and 5-Tire rotation.

Diagonal

Horizontal

4-Tire rotation

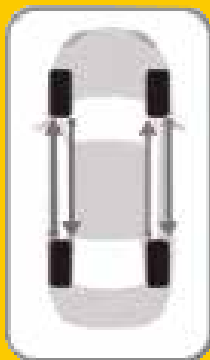

Can be done by diagonal, horizontal or vertical rotation

For diagonal rotation;

it is done by swapping the front left tire to right rear and front right tire with the rear left.

For horizontal rotation,

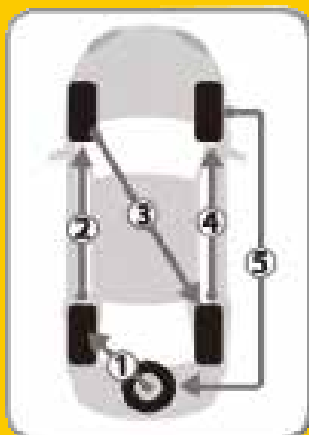

it is done by exchanging the front right wheel with the left front wheel. Likewise for the rear wheels, rear right tire will be exchanged with the left rear tire. This method is normally used for non-directional tires.

Vertical

For vertical rotation,

it is done by swapping the front right tire with the back right tire, and the front left tire with the back left tire. This method is normally used for directional tread pattern tires.

5-Tires rotation (with spare tire)

5 tire rotation relatively similar to the 4 tire diagonal, except that the spare tire will also be rotated. The spare tire is to be mounted on the left rear, left rear tire moved to the front left. The left front tire will be moved to right back and right back to be moved to the front right. Lastly, the right front tire will be used as the spare tire. This method of rotation is normally used for 4-wheel and all-wheel drive vehicles.

Note: Do not use the 5-Tire rotation method if the spare tire is of a different brand/model to the rest of the tires.
